SENIOR MANAGEMENT PROFESSIONAL – FOOD TECHNOLOGIST

Production Planning | New Product Development | P&L | Quality Control | Plant Operations | Projects | Maintenance | HR | HSE | Supply Chain

Enterprising leader and planner with a proven track record of optimizing plant operations, increasing productivity, and improving procedures.

KEY SKILLS	PROFILE SUMMARY
• Production Planning • Plant Maintenance • New Product Development • Budgeting/Cost Control • Team Management • Warehouse Management • General Administration • Procurement • Supply Chain • Inventory Control • Government Liaisoning • Time Management	• Result-driven Food professional with 24 years of experience in Production & Factory Operations, worked in India and other African countries (Nigeria, Malawi, and Angola). • Expertise in producing diverse food products, encompassing extruded products (snacks, soya chunks, breakfast cereals, and premix/supplementary. Jam, tomato ketchup, ready-to-eat meals (retort process), frozen snacks, flour milling, pulses/grain processing, snacks (Indian snacks, salted and spicy peanuts, roasted dry fruits, and potato chips), beverages (CSD, juices, and water), and green and red chili sauce. • Efficient management of multi-unit operations, 3rd party manufacturing, green/brownfield projects, material planning, HR management, procurement, maintenance, supply chain management, team building, product costing, inter-department coordination, and profit & loss analysis. • Successfully led the implementation of Food Safety Management Systems (FSMS), British Retail Consortium (BRC) standards, 5S methodology, Hazard Analysis & Critical Control Points (HACCP), Good Manufacturing Practices (GMP), Good Hygiene Practices (GHP), and Lean manufacturing principles.

CORE COMPETENCIES

Operational & Manufacturing Strategy

- Effectively manage factory operations across multiple sites, focusing on operational excellence and enhancing efficiency, productivity, and cost-effectiveness. Traveling to other units & third party locations, provide hands-on leadership, conduct audits to ensure safety and efficiency, and collaborate with cross-functional teams to address production challenges. Responsible for preparing the annual budget aligned with sales targets, and presenting it to the Board of Directors for approval.

Profit & Loss (P&L) Management

- Oversee the company's P&L with a focus on profitability and operational efficiency, through detailed financial analyses, identify opportunities to optimize profitability and work closely with the Marketing, Sales and finance team to meet our financial targets.

Supply Chain Management

- Develop long-term plans and strategies to effectively anticipate demand, align production schedules, and establish organizational targets, this process involves planning and forecasting of demand as indicated by the Sales team. Prioritize ensuring that suppliers deliver materials on time as per production plan to facilitate efficient production processes, optimize resource utilization, and uphold quality standards. My responsibilities include overseeing the movement of goods from the factory to customers, which encompasses the management of warehousing, transportation, and delivery. Also ensure that inventory levels are adequate to meet demand while minimizing costs. Furthermore, identify and mitigate potential risks to the supply chain, disruptions, supply shortages, or quality issues. Engage with various stakeholders, including suppliers, manufacturers, distributors, and customers, to ensure seamless operations and promote an efficient supply chain flow.

Stakeholder Management

- Build strong relationships with stakeholders, fostering collaboration among teams and external partners. Negotiate with clients and vendors to achieve operational goals that align with broader business objectives.

Team Leadership & Development

- Provide guidance and mentorship to a diverse team, focusing on performance management and employee engagement. Promote a culture of accountability and ethics and work with HR to address manpower and union matters.

Plant Maintenance & Projects

- Oversee maintenance and repair operations to ensure reliability and minimize downtime of machines. Additionally, I lead Greenfield and Brownfield projects, emphasizing timely completion and strict adherence to project scopes.

PROFESSIONAL EXPERIENCE

Sept 2020 – till date

Morton Foods Ltd. (Birla) - Prayagraj, U.P. (India) as General Manager - Factory

Morton Foods Ltd., a division of the K.K. Birla Group, produces and distributes over 200 SKUs of products aimed at the Armed Forces, institutional, modern trade, and retail markets. The product portfolio:
