📍 Hinjewadi, Pune.

As a passionate enthusiast of the food industry, I'm on the lookout for a company that shares my drive for growth and development. Ready to tackle challenges and eager to expand my knowledge!

PROFILE

Food Technologist with 3+ years of experience in developing clean-label, functional food products. Skilled in ingredient functionality, formulation, and process optimization for enhanced taste, texture, and stability. Hands-on expertise in end-to-end product development, sensory analysis, shelf-life studies, and functional ingredient integration. Familiar with FSSAI, FDA, HACCP, and GMP regulations. Experienced in extrusion, thermal processing, and food preservation. Strong in cross-functional collaboration and translating market insights into innovative, health-focused solutions.

Technical Skills: Food Quality and Safety, Regulatory Affairs,, Research, Product Development, Food Labelling, Documentation, Training.

JOB PROFILE:-

Company :- True-Elements (HW Wellness Solutions Pvt. Ltd. Hinjewadi) (Feb.2022-.Present)

Designation: New Product Development Executive

Role & Responsibilities: -

New Product Development & Innovation:

- Ideated, formulated, and launched clean-label food products including muesli, oatmeal, seed mixes, trail mixes, instant drink mixes, peanut butter variants, snack bars, savory snacks, Indian breakfast mixes with powdered seasonings, and sweet snacks using natural sugar alternatives—without preservatives or artificial additives.
- Conducted market surveys and benchmarking to replicate and enhance high-demand products.
- Performed shelf-life studies evaluating sensory, chemical, physical, microbiological, nutritional, and functional stability under recommended storage conditions.
- Executed lab-scale and commercial trials using drum-roasting machines, industrial ovens, and packaging lines to validate feasibility and scalability.
- Improved existing product formulations to enhance taste, texture, quality, and nutritional value.

Ingredient & Nutritional Expertise:

- Monitored and ensured nutritional compliance through regular external lab testing aligned with FSSAI and other food regulations
- Formulated functional food products using natural ingredients like edible seeds, nuts, and grains, focused on healthy breakfast and snack categories

Sensory & Quality Evaluation:

- Conducted in-house organoleptic evaluations through blind tasting using the Hedonic scale to assess sensory attributes of new and existing products. Delivered employee training sessions on sensory protocols and product evaluation techniques.

Regulatory Compliance & Documentation:

- Prepared and documented SOPs for commercial production to support consistency and regulatory compliance.
- Maintained records for new product development, trials, approvals, and vendor documentation.
- Handled vendor onboarding and document retention for long-term partnerships.

Packaging & Labelling:

- Designed lithography and product labels in alignment with packaging type, material, and dimensions.

- Contributed to festive and corporate gifting projects by finalizing packaging design and product selection.

Cross-Functional Collaboration & Communication:

- Worked closely with Production and Supply Chain teams to ensure alignment with product specifications and launch schedules.
- Coordinated with the Marketing team to provide product details, launch content, cost estimations, and support for nutrition-based website content.

Training & Knowledge Transfer:

- Conducted training sessions for team members on the full product portfolio, including features, unique selling points (USPs), and market positioning.
- Supported internal teams in understanding new product launches and updates.

Research and New Product Development Intern-True Elements *(January 2022 to February 2022)*

- New product development with innovative techniques and technologies.
- Rework on existing products for a better experience.
- Research on emerging trends in the food sector.
- Sensory Evaluation of the products.

Quality Control Intern- Mapro Foods Pvt. Ltd Wai, Mahabaleshwar *(May 2019 to April 2019)*

- Conducted regular inspections of raw materials, in-process, and finished products to ensure alignment with internal quality standards and regulatory requirements.
- Prepared detailed quality reports highlighting defects, non-conformities, test results, and corrective actions.
- Monitored production operations to ensure adherence to food safety protocols, hygiene practices, and GMP guidelines.
- Analysed quality control data to identify trends, root causes, and areas for continuous process and product improvement.

Certifications:

- Food Safety Supervisor FoSTaC - Advanced Certification
- Nutrition Education Programme on Food Fortification.
- Food allergy and intolerance training assessment programme.

Academic Project:

Title: Lactose Intolerance in Tandali Village

- Conducted a detailed survey to assess awareness and prevalence of lactose intolerance in the rural population of Tandali.
- Analyzed dietary habits and symptoms, and identified lactose intolerance trends using collected data.
- Educated the community on suitable dietary alternatives and created awareness materials on lactose-free nutrition.
