

JOB OBJECTIVE

Leveraged the extensive expertise in managing **Poultry Processing Plants, Meat Processing Industries, and Feed Mills (Poultry, Animal, Aqua)** as a results-driven professional aspiring to the **Leadership Roles**. Dedicated to driving organizational growth through strategic planning, operational excellence, and adherence to international quality standards, while fostering innovation, efficiency, and team development to achieve sustainable business success.

EDUCATION

2001: Bachelor of Engineering (Mechanical) from Sir M.V.I.T, Bangalore University, Karnataka, India.

CORE COMPETENCIES

- Strategic Operations Management
- Meat and Poultry Processing
- Feed Mill Operations and Maintenance
- Quality Assurance (HACCP, GMP, ISO 22000)
- Production Planning and Optimization
- Team Leadership and Development
- Cost Control and Budget Management
- Supply Chain and Procurement Management
- Preventive and Predictive Maintenance
- Process Automation and Efficiency

TECHNICAL SKILLS

- Pro E (3D Modeling)
- AutoCAD
- C, C++
- MS Word
- MS Excel
- MS Power Point

PROFILE SUMMARY

- Extensive Industry Expertise:** Over 27 years of diversified experience in managing operations across **Feed Mills** (poultry, cattle, animal, and aqua) and **Meat Processing Industries** (poultry, buffalo, goat, lamb). Proficient in strategic planning and operational execution.
- Leadership Acumen:** Demonstrated capability in leading large teams, ranging from 70 to over 500 employees, ensuring alignment with organizational goals and operational excellence.
- Operational Excellence:** Skilled in implementing and optimizing **SOPs, SSOPs, HACCP**, and **OSHA safety standards**, enhancing compliance, productivity, and safety across facilities.
- Technical Proficiency:** Expertise in maintaining and optimizing machinery from renowned manufacturers like Meyn, Marel Stork, Buhler, Idah, Andritz Sprout, and others, ensuring seamless operations in production and maintenance.
- Continuous Improvement Initiatives:** Adept at **time and method studies, process improvements**, and implementing solutions like root cause analysis and fishbone diagrams to reduce costs and enhance ROI.
- Strategic Business Development:** Proven ability to set strategic directions for achieving production targets, improving yields, optimizing costs, and enhancing plant capacity through innovative approaches and resource utilization.
- Cross-functional Team Collaboration:** Skilled in fostering cohesion among culturally diverse teams, inspiring team members, and bridging gaps to achieve organizational objectives effectively.
- Adaptability and Vision:** Adept at swiftly integrating into new environments and leveraging past experiences to innovate and adapt processes, achieving sustainable operational and financial outcomes.

Notable Accomplishments Across the Career

- Optimized Feed Mill Operations:** Enhanced productivity and increased feed mill plant yield to an impressive **99%**, while minimizing and maintaining process loss at **1%**. Successfully increased cattle feed production from **200 MT/day to 240 MT/day** and poultry feed production from **180 MT/day to 200 MT/day**.
- Cost Efficiency Improvements:** Reduced boiler fuel costs from **₹180/MT to ₹142/MT**, decreasing energy costs from **₹350/MT to ₹330/MT**. Lowered operational costs of water treatment from **₹21/KL to ₹18/KL**, ensuring higher quality treated water and enhanced DAF (Dissolved Air Flotation) performance.
- Poultry Processing & Meat Processing Enhancements:** Improved de-boning yield from **37% to 39.2%**, and boosted goat carcass yield from **45.5% to 48%** through strategic breed selection (Borana). Achieved a **20% increase in poultry protein meal production** and a **40% rise in poultry fat (oil)** production by optimizing rendering plant machinery efficiencies.
- Project Management & Infrastructure Development:** Led the design and construction of **palletized cold stores, blast freezers, rendering plants, digesters**, and additional equipment like pellet and mixer machines, ensuring timely project delivery with bar chart planning.
- Operational Excellence:** Addressed and resolved critical quality issues, significantly enhancing daily production. Improved machine efficiencies for PNT, Maestro, and Vent Opener systems, driving productivity while minimizing material wastage.
- Strategic Oversight:** Managed operations across **six feed factories**, including cattle and poultry feed plants at different locations, ensuring streamlined processes and consistent performance.

TRAININGS

Preventive and predictive maintenance –
ISCOSA, Cost Control – Dallah Human
Skills, Occupational Safety (OSHA) act

Siemens, Creative Thinking, ISO –
HACCP, 3rd Millennium Manager, 5S, ERP,
Value Engineering/Value Analysis (2017)
etc.

WORK EXPERIENCE

Chief Manager – Cattle Feed Plant | Indian Potash Limited, Tirupati, Andhra Pradesh, India | July 2018 – Present

- Leading the plant as **Production Head** and **Profit Center Head**, overseeing all operational and financial aspects.
- Planning, scheduling, and monitoring daily production and maintenance activities.
- Coordinating with procurement, engineering, quality assurance, logistics, finance, HSSE, warehouse, HR, and sales teams to ensure seamless operations.
- Managing compliance with government regulations and statutory requirements.
- Driving cost control initiatives across operations, including fuel, energy, maintenance, and variable costs.
- Ensuring optimal capacity utilization, productivity, and efficiency of the plant.
- Conducting production meetings to align team leaders with organizational objectives.
- Leading the implementation of preventive, predictive, and corrective maintenance schedules.
- Introducing machine modifications and automations to enhance production output and mill performance.
- Overseeing CAPEX, planning, inventory control, & operational cost management.
- Spearheading continuous improvement initiatives, achieving a **maintenance cost reduction** from ₹220 to ₹180 per MT.
- Ensuring adherence to GMP, SOP, and HACCP standards, and conducting regular safety and HSE meetings.
- Mentoring and developing teams to achieve operational excellence.
- Reduced maintenance costs and improved overall operational efficiency.
- Successfully aligned plant operations with business profitability goals, achieving consistent KPI performance.

Plant Operations Manager | Careysburg Slaughterhouse, Liberia | September 2017 – March 2018

- Directed plant operations, including production, sales, maintenance, procurement, and compliance.
- Managed chilled and frozen meat processing operations for sheep, goat, and cattle.
- Developed and implemented business strategies, budgets, and operational plans, reporting directly to the Board of Directors.
- Oversaw quality management systems, achieving ISO and HACCP certification.
- Established effective waste management systems for solid and liquid waste.

Senior Manager – Feed Mill Operations | Baramati Agro Ltd, Pune, India | March 2017 – September 2017

- Managed operations across six cattle and poultry feed mills, ensuring production efficiency and quality.
- Directed teams for capacity utilization, team building, and operational enhancements.
- Implemented ISO and HACCP standards, reducing wastages and improving factory performance.
- Coordinated with marketing and nutrition teams for product development and optimization.

Factory Manager | Frigorifico Allana Ltd, Aligarh, India, and Ethiopia, East Africa | January 2013 – March 2016

- Oversaw production, engineering, procurement, waste management, and compliance for meat and processed food plants.

- Managed new projects, including civil and mechanical works, achieving expansions in cold storage and processing capacity.
- Achieved international certifications and approvals, facilitating meat exports to UAE, Saudi Arabia, Egypt, and Azerbaijan.
- Implemented ISO and HACCP quality systems across operations.
- Expanded production capacity and improved operational efficiency.

Factory Manager – Poultry Processing Plant | Godrej Tyson Foods, Bangalore, India | April 2012 – January 2013

- Managed poultry processing operations, including production, quality, supply chain, and compliance.
- Developed value-added products and coordinated new product launches with marketing teams.
- Conducted regular performance evaluations and training sessions to motivate and build team capacity.
- Improved productivity and reduced operational costs through strategic initiatives.

Assistant General Manager – Aqua Feed Mill Operations | Avanti Thai Aqua Feeds, Gujarat, India | June 2011 – April 2012

- Led factory operations, ensuring high-quality feed production for shrimp and fish.
- Implemented SOPs, GMPs, and ISO standards to enhance production quality and operational efficiency.
- Conducted regular meetings with departmental heads to drive improvements and benchmark performance.

Senior Engineering Manager | Al Marai Poultry, Kingdom of Saudi Arabia | March 2010 – June 2011

- Planned and executed maintenance schedules to ensure uninterrupted production in a high-capacity poultry processing plant.
- Implemented energy audits, preventive maintenance programs, and team training initiatives to enhance plant efficiency.

Production Manager – Animal Feed Mill | Fujairah Feed Factory, United Arab Emirates | November 2008 – January 2010

- Supervised feed production, maintenance, and quality control for diverse animal feeds.
- Established and maintained ISO 9001:2008 and HACCP systems for quality and safety compliance.
- Developed new products and streamlined operations to reduce wastages and improve plant performance.

Mechanical Engineer – Poultry Processing Plants | Al Watania Poultry, Kingdom of Saudi Arabia | February 2007 – November 2008

- Oversaw the production and maintenance of advanced poultry processing operations, ensuring seamless workflow and optimal equipment performance.
- Implemented process improvements that enhanced operational efficiency and minimized downtime.

Production and Maintenance Manager – Poultry Feed Mills | Charoen Pokphand (India) Pvt. Ltd., Bangalore, Karnataka, India | December 1999 – January 2007

- Managed production and maintenance activities in large-scale feed mills as part of the Thailand-based C.P. Group.
- Optimized production processes and ensured compliance with industry standards, contributing to cost efficiency and high product quality.

Production Engineer | Vahini Industries, Bangalore | January 1997 – January 1999

- Directed engineering and production processes in a manufacturing setup, ensuring adherence to quality and operational standards.
- Coordinated with cross-functional teams to meet production targets and improve operational efficiency.

Lecturer – Mechanical Engineering | S.J.E.S. Polytechnic, Bangalore | January 1996 – January 1997

- Educated and mentored diploma students in mechanical engineering, focusing on practical and theoretical aspects of the subject.

PERSONAL DETAILS

Date of Birth: 24-07-1972

Languages Known: English, Tamil, Telugu, Kannnda, and Hindi

Address: Tirupati, Andhra Pradesh, 517502
