OBJECTIVE

I am seeking an opportunity to collaborate with a highly skilled and professionally managed progressive organization. The main goal is to improve processes so that defects of any kind do not arise while the products are being developed on the manufacturing line. I am eager to continuously learn and enhance my knowledge and abilities, while also making valuable contributions to the team.

EXPERIENCE

Presently associated with Britannia Industries Ltd Ranjangaon, Pune as Quality Assurance Officer (from June 2019 till date)

Previously associated with Stern Ingredients India Pvt Ltd. Umbergaon (Since Feb 2019 to June 2019)

Key Responsibilities

Britannia Industries Limited (from June 2019 till date)

Responsible for defining QA strategy, approach and execution in development projects, leading and directing the QA leadership team.

Lead the quality control efforts for our bakery production line, ensuring that all products meet the established quality standards and comply with food safety regulations. Provide technical leadership and expertise within the field of Quality Assurance and Testing.

Conduct routine inspections and tests on incoming raw materials, intermediate products, and finished goods when needed to ensure team is supported in activities related to compliance with specifications and quality parameters.

Collaborate with the production team to develop and implement quality control procedures and work instructions, ensuring they are followed consistently.

Interaction with plant management which includes assisting departments in researching quality-related issues.

Act as QA department point of contact in the absence of the QA manager. Monitor and verify QA department responsibilities.

Monitor and enforce proper sanitation and hygiene practices within the production area to maintain a clean and safe work environment. Provide guidance and training to production line staff on quality standards, procedures, and best practices.

Investigate customer complaints or internal quality incidents, identify root causes, and implement corrective and preventive actions to address them effectively.

Stay up to date with industry trends, regulatory changes, and best practices in quality control and food safety. Make recommendations for continuous improvement.

Immediate & suitable action against issues related to process/system/norm non-adherence, equipment malfunctioning, quality monitoring, food safety & hygiene to prevent the outcome affecting consumers & brand value.

Work with QA managers, Development managers to develop and execute QA strategies to meet and exceed department and corporate quality goals.

QA lead in PCT (Pre Commercial trials- R&D) on plant scale. Provide technical expertise in Test Automation, Testing Methodologies, Testing Processes, Tools and Techniques across the teams.

Validation of critical process equipment's like weighing balances, metal detectors, sifters, Oven, slicers and coders to avoid unnecessary deviations.

Consumer Complaints

Share each & every complaint as & when they are received with management & concerned supervisors, operators & shop floor workers.

Identify probable causes of the complaint irrespective of sample availability in consultation with management, supervisors, operators & workers.

Assist in designing corrective & preventive measures along with the team & implement the same with immediate effect

Evaluate the effectiveness of action through regular evaluation of process & product & trend of complaint of similar nature in subsequent months.

Documentation & Record

Maintain accurate documentation of quality control activities, including inspection reports, test results, and non-conformities. Ensure compliance with record-keeping requirements.

SAP utilization for used raw material, packing material & finished goods, lab consumable management PR, PO & GRN preparation & release on daily basis.

Analyze and interpret quality data, identifying trends, patterns, and potential areas for improvement. Generate reports and communicate findings to relevant stakeholders.

Stern Ingredients India Pvt Ltd (Since Feb 2019 to June 2019)

Responsible for to ensure the quality of incoming RM and FG specification, Process development as per product category as per bench product to the customer.

Detailed Knowledge of bakery ingredients as well as additives, colours & flavours. Carry out Bakery trial at pilot scale facilities for evaluation of application.

Responsible for handling of documents related to Quality parameters of the RM, PM, FG and Customer Samples.

To ensure and Monitor effective implementation of GMP in all process and GLP in Laboratory. Co-ordination with external agency i.e. weight & measure, ISO Certification, Calibration, Validation etc.

Customer Visit as 'Technical Filed Officer'.
