

Jayaprakash Arjunan

Microbiologist

SUMMARY

Accomplished Microbiologist with over 14.5 years of dedicated experience in the pharmaceutical and food industries, excels in method development, equipment calibration, and validation within GLP and cGMP environments. Worked in diverse international settings, including Singapore and India. Skilled in isolating and identifying microorganisms, demonstrates expertise in quality analysis, microbial testing, and stringent quality control measures. Specialises in enhancing laboratory efficiency through procedural optimisations and maintaining compliance with ISO, FDA, and cGMP guidelines. Adept at leading teams and managing complex laboratory operations, consistently delivering accurate and timely results.

PROFESSIONAL EXPERIENCE

Microbiologist

Wyeth Nutritional (Singapore) Pte Limited, Singapore

Jan 2010 – Sep 2023

- Operated and calibrated various microbiological instruments, ensuring compliance with industry standards.
- Conducted environmental monitoring using Settle Plate, Air Sampling, Contact Plate, and Swab methods.
- Performed testing on finished products, raw materials, and environmental samples for microbial species, including Salmonella, Listeria, Cronobacter, and other microorganisms.
- Utilized Gemini, Vitek II, PCR, and other microbiological analysis and counts methods, such as Total Aerobic, Mesophilic, and Thermophilic.
- Method Validation and verification of ISO test methods, including hand soaps and sanitisers and antibiotic detection on raw materials.
- Maintained ATCC stock culture and adhered to strict method verification and validation standards.
- Compiled monthly trend reports and participated in pest control management, generating documentation within SAP/LIMS environments.
- Ensured up-to-date maintenance of all departmental logs, SOPs, and control documents.
- Led cost-saving initiatives and optimised laboratory consumables without compromising ISO standards.
- Managed laboratory investigations, implemented change controls, and prepared Corrective and Preventative Action (CAPA) reports, ensuring problem-solving and continuous improvement.
- Coordinated with other departments on process optimisation projects and internal and external audit collaborations.
- Contributed to procurement activities, managed ready-to-use and dehydrated, and was involved in sensory evaluation.
- Trained new team members, managed task assignments, and drove quality control improvements by enhancing laboratory workflows.

Microbiologist

Nectar Life Sciences Limited, Punjab, India

Apr 2009 – Jan 2010

- Managed water analysis for WFI, PUB, and potable water, including FP and RM. Sterility, BET, and TOC assessments were also performed.
- Applied various staining techniques for detailed microbial analysis.
- Conducted Microbial Limits Testing (MLT) for finished products, raw materials, and purified water.
- Oversaw environmental monitoring and media preparation for microbial testing; executed necessary decontaminations.
- Participated in the calibration and validation team and maintained departmental logbooks up to date.
- Performed fumigation activities to ensure a sterile laboratory environment.
- Managed GP-Test for in-house and commercial media, ensuring quality control and compliance.

EDUCATION

- Master of Philosophy in Microbiology** from Periyar University, Tamil Nadu, India, 2006 – 2007
- Master of Science in Microbiology** from Bharathidasan University, Tamil Nadu, India, 2004 – 2006
- Bachelor of Science in Microbiology** from Periyar University, Tamil Nadu, India, 2001 – 2004

CERTIFICATIONS

- Good Manufacturing Practice (GMP) for Food Industry** (Mar 2024)
- ISO 45001:2018 Occupational Health and Safety Management System (OHSMS)** (Mar 2024)
- Industrial Hygienist** (Mar 2024)
- ISO 17025:2017 Laboratory Management System (LMS)** (Mar 2024)
- ISO 22000:2018 Food Safety Management Systems (FSMS)/Food Safety System Certification (FSSC)** (Mar 2024)
- ISO 9001:2015 Quality Management System (QMS)** (Feb 2024)
- Lean Six-Sigma Green Belt** (Jan 2024)
- Lean Six-Sigma Yellow Belt** (Jan 2024)
- ISO 14001:2015 Environmental Management Systems** (Mar 2024)

AREAS OF EXPERTISE

- Microbiological Instrumentation
- Environmental Monitoring
- Microbial Testing and Pathogen Detection
- Water Analysis and Quality Assurance
- Method Validation and Standardization
- Sterility Assurance and Contamination Control
- Microbial Species Identification
- ATCC Stock Culture Maintenance
- Corrective and Preventative Action
- Process Optimization
- Internal and External Audit Collaboration
- Pest Control Management
- Change Control Management
- Environmental Trend Analysis
- Sterile Laboratory Protocols
- Microbial Limits Testing (MLT)
- Biochemical Oxygen Demand (BOD) Testing
- Total Organic Carbon (TOC) Analysis
- Calibration and Validation of Laboratory Equipment
- Task prioritisation and Decision Making
- Compliance with GLP/cGMP Standards
- Documentation and Reporting
- Quality Control and Troubleshooting
- Cost Management and Optimization
- Team Leadership and Training
- Problem Solving and Analytical Skills
- Effective Communication
- Collaboration and Teamwork

TECHNICAL SKILLS

- Lab Tools:** Gemini, Vitek II, PCR
- Quality Standards:** ISO 9001, ISO 22000, ISO 17025
- Compliance:** GLP, GMP
- Software Systems:** SAP, LIMS
- Others:** Excel, PowerPoint, Spreadsheets and social media
