

Zeeshan Sheikh

Dep. Manager Operations

 **Phone:** (+91) 7355696165/ 7889546604

 **Email address:** zeeshaan.amin@gmail.com

 **Address:** New Delhi, India

Professional Summary

Operations and Production Management professional with over **11 years** of progressive experience in high-performance food and manufacturing environments, including top global brands like **Nestlé, Danone, and Grupo Bimbo**. Deep expertise in high-speed manufacturing processes and operations, with a strong focus on efficiency, product quality, and food safety. A **Lean Six Sigma Black Belt**, I have driven major cost-saving initiatives, launched high-impact improvement projects, and led high-performing teams while aligning with global best practices. Committed to continuous improvement and operational excellence in a fast-paced, quality-driven environment like your organization.

Core Competencies

- Baking Operations Management (Buns, Bread, QSR Products)
- Dairy Process Engineering (Spray Drying, Evaporation, Formulation)
- Lean Manufacturing | Six Sigma Black Belt | TPM
- Food Safety Systems (FSSC 22000, HACCP, GMP)
- End-to-End Production Management
- Strategic Planning and KPI Delivery
- New Product Development (Powdered Dairy, Buns and Bread)
- Team Building and Performance Coaching
- Audit Compliance (Regulatory, Internal, Global QMS)
- Cost Optimization & Energy Efficiency
- SAP & MES Proficiency
- Data analysis

Professional Experience

Deputy Operations Manager – Grupo Bimbo

Bhiwadi, India | Mar 2024 – Present

- Leading QSR manufacturing operations (including food-based buns and emulsified products) with a focus on freshness standards, and high-speed automation.
- Partnered with R&D and QSR customers for new product developments and audits.
- Streamlined production scheduling, dispatch planning, and raw/packaging material coordination.
- Spearheaded waste reduction, throughput improvement, and OEE enhancement projects.

Performance Excellence Lead – Danone Nutricia

Punjab, India | Jan 2023 – Feb 2024

- Owned productivity and efficiency roadmap for a food-based nutrition plant producing infant formulas and adult nutritional powders.
- Benchmarked plant performance against Danone global dairy sites in Europe and Asia; introduced best practices in dry blending, powder hygiene, and allergen management.
- Implemented real-time loss tracking in powdered product handling, reducing yield loss in packing by 18%.
- Standardized process capability studies (Cp, Cpk) on key parameters like moisture content, bulk density, and spray-dried granule size.
- Conducted energy mapping of evaporator units to optimize steam usage with 20% cost reduction.

Sr. Production Executive – Danone Nutricia

Punjab, India | Jan 2021 – Dec 2022

- Led section operations for Can and BIB (Bag-in-Box) lines handling over 15 SKUs.
- Boosted production output by 7% and improved line efficiency by 4% through targeted enhancements in the filling process and quality control checks.
- Trained shop-floor teams on hygienic design principles, emphasizing prevention of powder segregation, microbial hotspots, and allergen cross-contact.
- Facilitated global and local audits, including Danone Corporate, ISO 22000, and regulatory bodies, with zero non-conformances.

Production Executive – Danone Nutricia

Punjab, India | Apr 2017 – Jan 2021

- Handled daily operations for Drying Unit, Heating Unit, and Wet Blending in a GMP-compliant manufacturing environment.

- Coordinated large-scale New Product Development (NPD) for food-based nutritional powders, involving product enhancement and process improvements.
- Reduced material loss in drying by 25% via fine-tuning atomizer speed, inlet air parameters, and CIP frequency.
- Trained shift teams in ATEX safety and powder behavior.
- Played a vital role in implementing visual SOPs and One-Point Lessons (OPLs) for critical production processes.

Production Officer – Nestlé India Ltd.

Punjab, India | Aug 2014 – Apr 2017

- Managed production of processed cereals in a high-compliance environment, ensuring product quality for infant consumption.
- Executed stringent dry zone hygiene standards, allergen management, and moisture control.
- Led training under TPM's Education & Training pillar for new operators on material handling, pasteurization principles, and critical limits in drying.

Graduate Apprentice Trainee – Nestlé India Ltd.

Punjab, India | Aug 2013 – Aug 2014

- Focused on plant hygiene, HACCP implementation, and root cause analysis of complaints.
- Executed pest-proofing initiatives and quality audits.

Key Accomplishments/ Projects:

- **25% Loss Reduction** in milk powder post drying through DMAIC-driven improvement project (INR 45L savings/year)
- **50% Water Reduction** during CIP cycles of evaporator and dryer systems, aligned with sustainability goals.
- **30% Time Reduction** in dryer CIP using sequence optimization and lean startup procedures.
- **Energy Optimization:** Reduced steam consumption in evaporators by 35% by doing heat mapping exercise and condensate recovery.
- **Productivity Boost:** Increased output from the spray dryer by 5% by making process parameter adjustments, without compromising on quality.
- **Kaizen Champion:** Cut powder rework by 30% through root cause analysis of deposition patterns.
- **Audit Readiness:** Successfully led preparation and clearance of internal, external, and global audits (FSSC 22000, Halal, Nestlé QMS, Danone Global, etc.).

Education

Bachelor of Technology in Food Technology, Islamic University of Science & Technology, Kashmir, India

Aug'2009 – Jul'2013

- Graduated with 8.39 OGPA

Secondary School Education-Science Stream, Govt. Higher Secondary School, Kashmir, India

2006 – 2008

Languages

English	Superior
Hindi	Superior
